

A MICROCHIP ICD2 által támogatott IC-k listája:

Az ICD2-őt szoftver fejlesztéshez - nyomkövetésre, hibakeresésre, azaz "debuggolásra" - és mint IC programozót is használhatjuk.

A Microchip folyamatosan fejleszti az ICD2 programját, az alábbiak az MPLAB 8.0 pc szoftver tudásának megfelelő állapot.

A "debugger-full support" fejezetben azon IC-k listája, ahol a debugger funkciót használhatjuk, a "programmer full support" alatt az ICD2-vel programozható típusok sorakoznak. (Természetesen a két listában nagy az átfedés.)
